MOTORCYCLE & BIKE SECURITY

2025

ABOUT US

- 1998** **STARTING STRONG**
Back in 1998, Kovix began its journey with a clear goal - to develop high-quality locks to resist attacks and deter theft.
- 2000** **THE ROAD TO INNOVATION**
Innovation is at the core of Kovix, shaping our brand and reputation. In 2000, we brought together talented engineers to enhance our security tech and boost brand recognition through our R&D division.
- 2004** **EXPANDING GLOBALLY**
Recognizing the growing potential in the global market, we have firmly believed in our ability to deliver outstanding value to riders worldwide. In 2004, our offerings received highly positive feedback in the local market, inspiring us to expand our products to reach riders beyond our home.
- 2021** **INTRODUCING THE FIRST ALARM TRAILER COUPLER LOCK**
Despite significant advancements in security locks, the theft of outdoor gear continues to be a global issue. To tackle this challenge, we introduced the ground-breaking Kovix Outdoor series in 2021. We take pride in being the first manufacturer to integrate a 120dB alarm with traditional Trailer Coupler Locks and Marine Locks, boosting their security to another level.
- 2022** **EXPANDING TO THE BIKE LOCK MARKET**
Originally known for our expertise in motorcycle locks, we expanded into the bicycle lock industry in 2022 with the launch of the Steel Thunder Series. This new product line offers cycling enthusiasts a variety of security options, featuring our signature 120dB alarm, durable steel construction, and accreditation from independent bodies, including Dutch ART, French SRA, and UK Sold Secure.
- 2024** **SETTING THE BAR HIGHER**
Kovix products are known for being tough, durable, and safe. To keep our promise, we have set up a professional test lab to ensure the products are meeting the international security standards. From tensile test to hardness checks, our tests are designed specifically for bike and motorcycle locks, guaranteeing our products are fulfilling the international security standards, as well as individual customer requirements.

THE JOURNEY AHEAD...

As we move forward, we stick to our original goal of offering a variety of security products for two-wheel enthusiasts. Our journey is filled with new ideas, quality, and a firm commitment to protecting what's important.

WHO GONNA TELL THE QUALITY ?

A TRUE PROMISE

Throughout the years, our goals have remained unwavering. Kovix is dedicated to delivering high-quality security accessories for outdoor rides. Our steadfast commitment to excellence ensures that our customers can trust in the reliability and effectiveness of our products.

SECURITY CERTIFICATIONS

ART FOUNDATION NETHERLANDS

Promotes security against theft by formulating requirements for mechanical safeguards for two-wheelers. Durability, Weather resistance, Machine, and Manual attack tests are usually performed to testify to the preventive value of a lock. The more stars a lock has, the higher its preventive value and the better it protects against theft. A lock with five stars has the most preventive value.

SOLD SECURE UK

Sold Secure is the UK's premier testing and certification body for all security products, dedicated to reducing the risk of crime by assessing security products through power tools, machine-based testing, and physical attack testing. Products that have passed a satisfactory evaluation will carry the coveted Sold Secure Approved quality mark.

CLASSE SRA FRANCE

SRA (SECURITY AND REPAIR OF AUTOMOBILES) is a professional organization established in France in 1977. Part of the SRA's primary mission is to participate in the prevention of vehicle theft. Classe SRA requires a highly detailed drawing of the lock before testing to determine the lock's weakest point. Then, sawing, lever/wedge attack, and drilling tests will be performed to evaluate the security product.

SECURITY RATING

1-3 EVERYDAY SECURITY

Locks rated 1-3 are suitable for low-risk areas and rural areas. Lightweight and portable, they offer basic safety, perfect for daily use.

4-6 SOLID SECURITY

Locks rated 4-6 are ideal for areas with low to medium theft risk and overnight rural parking. They are solid and recommended for urban riders.

7-9 EXTRA SECURITY

Locks rated 7-9 are considered high-security, effective against physical attacks. They are robust and best suited for medium to high theft-risk areas, such as college campuses and urban settings.

10-10+ ULTIMATE SECURITY

Security level 10 locks offer the highest level of security, enhanced resistance to physical attacks, and accreditation by independent testing bodies. Virtually indestructible, they are perfect for the highest theft-risk areas and urban overnight stays.

ALARM BOOST FEATURE

Enhanced with a 120-decibel alarm audible up to 1,500 feet, the motion sensor triggers an immediate alarm upon tampering. Additionally, weather-resistant, the lock can withstand rain, sand, and dust, ensuring reliability in various environmental conditions.

STEEL THUNDER

ROBUST ALARM ASSURED

The STEEL THUNDER bike locks are made from sturdy stainless steel and hardened steel, ensuring maximum security and rust resistance for cycling enthusiasts. Each lock in the range features a built-in 120-decibel alarm that emits a piercing sound to deter thieves when tampered with. Additionally, these locks come with IP67 waterproof certification, enabling them to withstand harsh weather conditions and ensuring your bike remains safe in any environment.

This new range has been certified by independent organizations, including Dutch ART, French SRA, and UK Sold Secure. These certification bodies are recognized and trusted for their thorough testing of lock quality in the industry, highlighting the excellence of the STEEL THUNDER range.

Experience a new level of safety with the Kovix STEEL THUNDER Series, designed to provide riders with the highest level of protection.

DISC LOCK

Robust Siren Disc Brake Lock against motorcycle thefts.

OUR MECHANISM

1. DISC TUMBLER LOCK MECHANISM

Composed of multiple rotating discs, only a specially cut key can turn the discs and allow the lock to open. Discs and keys are uniquely cut into over 15,000 combinations. The mutual opening rate is extremely low.

2. STAINLESS STEEL DISC PLATES

Strong material with resistance to lock picking, drilling and bumping.

3. CARBIDE REINFORCED STEEL LOCKING PIN

The locking pin has passed various tests performed by security agencies and is proven to resist bolt cutters and saw blades.

4. DOUBLE LOCK MECHANISM

Twin-spar lock chassis for double strength, cut and tensile resistance.

smart. LOCK

Introducing the Kovixsmart lock, a revolutionary security solution that offers both convenience and security. With its advanced features such as keyless unlocking through Bluetooth®3.0 and fingerprint recognition, this lock redefines the way you secure your beloved bike. The U shackle, made from hardened steel, guarantees exceptional durability and resistance to rust, ensuring long-lasting reliability.

Experience the future of security with the Kovixsmart lock – the perfect blend of convenience, durability, and advanced protection.

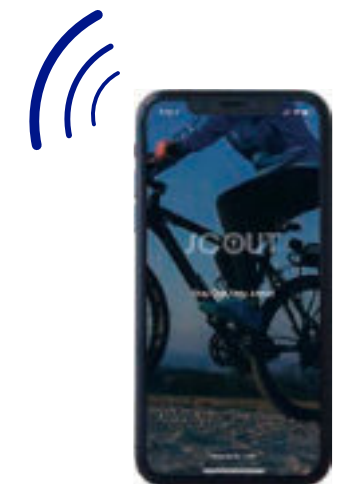

What sets the Kovixsmart lock apart is its inbuilt 120-decibel alarm system. This advanced feature activates upon detecting any movement, effectively deterring tampering and amplifying security. The lock also allows for easy access sharing, making it perfect for scenarios where multiple users need access to the same lock.
